INTRODUCTION

This report of the Salaries of Local Public Health Workers contains data from the fourth study of the salaries of selected classifications of public health workers in official agencies and the thirteenth study of the salaries of local public health nurses employed by local boards of education and nonofficial health agencies. The studies of salaries paid by local official health agencies have been sponsored by the Association of State and Territorial Health Officers, the American Public Health Association, and the Public Health Service. Previous reports were made in 1948, 1949, and 1950. The National Organization for Public Health Nursing has conducted annual studies of the salaries of local public health nurses since 1941. In 1949 and 1950 the information on salaries of public health nurses employed by local nonofficial health agencies and boards of education was published in supplements to the reports on the salaries of public health workers in local official health agencies. This year the data collected by the National Organization for Public Health Nursing were tabulated to make possible their incorporation in the body of the report.

Although two questionnaires were used, the general instructions to all respondents were the same. Employees whose duties did not fall within the scope of the job description to which the questionnaires were to be omitted. Gross monthly salary rates paid employees in each classification as of April, 1952 were to be listed with the number of employees at each salary rate. The salaries were to include all "cost of living" allowances and regularly authorized supplements, but not travel reimbursements or similar per diem allowances.

The job descriptions for the following classifications are comparable to those in previous studies: local health officers, sanitary engineers, professional laboratory workers, nurse directors in local nonofficial health agencies, supervising public health nurses, staff public health nurses and health educators. The composite job description of sanitarians and other sanitation personnel is comparable with the classification of sanitarians used in previous years. This year data were collected for the first time on the salaries of public health physicians (exclusive of local health officers), dentists, veterinarians, and clinic nurses. The job descriptions used are found on pages 82 and 83 of this report.

For the first time, salary data were obtained from full-time local health units serving jurisdictions of more than 250,000 population. Previous studies had been limited to the population group, 50,000 to 250,000. The number of questionnaires sent out to local official health agencies and the response by the population of the jurisdiction was:

	Population of Jurisdiction			
	Total	50,000 to 249,999	250,000 to 499,999	500,000 and over
Number of questionnaires				
Sent out	556	498	35	23
Received	483	429	32	22
Returned	87	86	91	96

The National Organization for Public Health Nursing obtained data on the salaries of nurses employed in the following three categories of positions:

Nurse directors in local nonofficial health agencies

Supervising nurses in local boards of education and nonofficial health agencies

Staff nurses in local boards of education and nonofficial health agencies

Questionnaires were sent to 372 local nonofficial health agencies and 291 local boards of education chosen to represent different types of services, sizes of staffs, and geographical locations within the United States. Returns were received from approximately 66% of the nonofficial health agencies and 66% of the boards of education.

The only data included in the report for units of less than 50,000 population are those collected by the National Organization for Public Health Nursing.

The salary distribution of each of the occupational groups included in the study is presented by means of bar charts, with the median salary intervals and the ranges indicated. The charts for supervising public health nurses and staff public health nurses are based on the salaries of all personnel in these categories reported from areas of 50,000 or more population, from local health units, nonofficial health agencies and boards of education.

Following the charts a summary table is presented for each classification showing the distribution of salaries by population groups. Detailed tables giving salary data by States within groupings of Federal Security Agency Regions are included after the summary table for each occupational group except for veterinarians and health educators. For supervising public health nurses and staff public health nurses, additional summary tables are presented showing salary distributions in:

Local health units by Federal Security Agency Regions

Nonofficial health agencies by Federal Security Agency Regions

Boards of education by Federal Security Agency Regions

Nonofficial health agencies and boards of education by population groups

Caution should be used in interpreting comparisons of salaries between States. The organizational patterns, the responsibilities of individual positions, and qualifications of incumbents vary greatly from area to area, and according to size of staff. Local health units in some States carry responsibilities which are considered to be State responsibilities in other States.

SUMMARY

Evaluation of the following data on salary increases should be made in terms of a two-year span for salaries of public health workers in official health units. A comprehensive study of salaries of this group was not made in April, 1951. The National Organization for Public Health Nursing did include a sample of nursing salaries in official agencies as part of its April, 1951 study of salaries of nurses employed by local boards of education and nonofficial health agencies, but these data have not been used in this report because only two of the twelve categories of official local public health workers are affected.

Salaries for public health workers employed in local health units serving areas of from 50,000 to 249,999 population have again risen in all except one of the occupational classifications for which data are available. No change was reported between April 1950 and April, 1952 for salaries of health educators. Increases since April, 1950 in the lower limits of median salary intervals ranged from 9%, or \$600, for local health officers, to 27%, or \$800, for professional laboratory workers.

The intervals within which the median salary appeared and the percentage changes in the lower limits of median salary intervals since 1948 are:

LOCAL HEALTH UNITS					
<u>Occupational Group</u>	<u>April, 1950</u>	<u>April, 1952</u>	<u>1948-49</u>	<u>1949-50</u>	<u>1950-52</u>

NA—Data not available

LOCAL BOARDS OF EDUCATION AND NONOFFICIAL HEALTH AGENCIES

<u>Occupational Group</u>	<u>April, 1950</u>	<u>April, 1951</u>	<u>April, 1952</u>	<u>1949-50</u>	<u>1950-51</u>	<u>1951-52</u>
Nonofficial Health Agencies						
Nurse Directors	3960-4319	4300-4399	4500-4599	+10	+ 9	+ 5
Supervising Nurses	3240-3359	3500-3599	3600-3699	no change	+ 8	+ 3
Staff Nurses	2520-2639	2600-2699	2800-2899	+ 5	+ 1	+ 8
Boards of Education						
Supervising Nurses	3600-3959	39-3999	4300-4399	+11	+ 8	+13
Staff Nurses	2880-3239	3200-3299	3500-3599	no change	+11	+ 9

Seventy-two of the local health units which have participated in all four studies of the salaries of local public health workers have reported salaries of health officers each time. The median salary intervals for this group of health officers and the percentage increases in the lower limits of these intervals by years are:

<u>Year</u>	<u>Median Salary Interval</u>	<u>Percentage Increase Over Previous Year</u>
1948	7200 - 7399	---
1949	8000 - 8199	+11
1950	8100 - 8599	+5
1952	9600 - 9799	+14

Generally speaking, the median salary intervals for the various occupational groups were found to be progressively higher as the size of the population served increased. This is illustrated by the changes in the lower limits of the median salary intervals for local health officers: \$8,400 in areas of 50,000 to 249,999 population; \$10,000 in areas 250,000 to 499,999; and \$12,000 in areas having population of 500,000 and more. There are some variations in this pattern between areas of 250,000 to 499,999 population and those having 500,000 and more population. Specifically, the lower limits of the median salary intervals for public health physicians (other than local health officers), dentists, sanitarians, and veterinarians are highest for the areas of 250,000 to 499,999 population.

The intervals within which the median salaries appeared, by population groups, are shown below:

<u>Occupational Group</u>	<u>All</u>	<u>Under 50,000</u>	<u>50,000 249,000</u>	<u>250,000 and over</u>	<u>250,000 499,999</u>	<u>500,000 and over</u>
Local Health Officers	8600-8799	---	8100-8599	---	10,000-10,499	12,000-12,499
Public Health Physicians	7000-7199	---	7000-7199	---	7200-7399	7000-7199

APPENDIX

Questionnaire--Full-time local health units

LOCAL HEALTH OFFICER: Plans, develops and directs a program of public health services for a local health unit (municipal, county, city-county, or district) which includes most or all of the following activities: collection of vital statistics and reporting of notifiable diseases; communicable disease control; environmental sanitation; operation of public health laboratories; maternal and child health services; community health education; and related activities.

Minimum educational requirement: M.D. degree from an approved medical school.

PUBLIC HEALTH PHYSICIAN (EXCLUSIVE OF LOCAL HEALTH OFFICER): On a full-time basis, assists the local health officer in administering the local health unit and/or serves as clinician, or medical consultant in the public health programs of the community.

Minimum educational requirement: M.D. degree from an approved medical school.

DENTIST: On a full-time basis, plans, develops and directs a program of public health dentistry, and/or serves as dental clinician in public health program.

Minimum educational requirement: D.D.S. degree from an approved dental school.

SANITARY ENGINEER: Performs responsible professional work in most or all of the following fields: water supply and treatment; sewage and industrial waste; refuse collection and disposal; insect, rodent, vermin, and weed control; sanitation of schools, camps, bathing places and recreational areas; water pollution; sanitation of food and dairy products and eating and drinking establishments; housing sanitation; and related fields.

SANITARIAN: Assists in the enforcement of laws and regulations in the field of environmental sanitation through inspections, investigations, and educational activities involving work of a technical nature in most or all of the following fields: water supply and sewage disposal; refuse collection and disposal; swimming pools, bathing places, and recreational areas; milk and food; housing, school, and institutional sanitation; rodent and insect control; control of nuisances; and related fields.

OTHER SANITATION PERSONNEL: Include personnel who have not been professionally trained who are engaged in general sanitation activities of a regulatory or educational nature. Do not include auxiliary workers such as rodent control service men, sprayers, tradesmen, laborers, etc., or personnel engaged in garbage and refuse collection and disposal, water and sewer maintenance, street cleaning, and catching dogs.

VETERINARIAN: On a full-time basis provides consultative and public health veterinary service in the local public health program, and assists in the administration of that program.

Minimum educational requirements: A.D.V.M. degree from a recognized school of veterinary medicine.

PROFESSIONAL LABORATORY WORKER: Performs professional work in bacteriology, serology, pathology, parasitology, or chemistry in one or more of the following: examinations to aid in the diagnosis, control and treatment of communicable and certain non-communicable diseases; examinations of water, sewage, industrial wastes, shellfish, etc.; examinations of milk, food, drugs, liquors, narcotics, etc.; production or provision of diagnostic, prophylactic and therapeutic preparations such as sera, antitoxins, toxins, vaccines, etc.; research and related activities.

Minimum educational requirement: Bachelor's degree in the biological sciences. (This classification does not include non-professional laboratory technicians.)

SUPERVISING PUBLIC HEALTH NURSE: Plans and directs the public health nursing program of the local health department, coordinates it with other health programs, directs and supervises the work of the nursing staff, assists in the recruitment and training of nurses, and performs related work.

STAFF LEVEL PUBLIC HEALTH NURSE: Performs direct public health nursing services in clinics, conferences, schools, homes, or industries, and performs related duties.

CLINIC NURSE: All nurses engaged full-time in public health clinical activities. Do not include nurses who engage in Public Health Field Work or who are assigned to in-patient hospital or institutional nursing services.

HEALTH EDUCATOR: By means of an analysis of the health needs and educational resources of a local area, plans and organizes a program of health education which includes most or all of the following activities: establishment and maintenance of close cooperation between all agencies (official and non-official) which may contribute to health education; consultation with other health department staff members on techniques of education; assistance in planning and directing a training program for public health personnel; consultation and guidance to various individuals and groups in the development of their health education activities; improvement of health education in the public school system; preparation and distribution of informational, publicity, and health educational material; and related activities.

Questionnaire-- Local Boards of Education and Non-Official Health Agencies

STATE NURSE: The staff nurse, under the direction of the supervisor, performs general public health nursing and other related work as assigned.

SUPERVISING NURSE: The supervising nurse, under the direction of a nurse director or other administrative official or governmental body, is responsible for the development and supervision of public health nursing services.

NURSE DIRECTOR: The nurse director is responsible, under the administrative official or governmental body, for the administration or nursing services.
